Education

Kanpur Institute of Technology (KIT), AKTU Computer Science & Engineering (Percentage: 68.41)	2021 Kanpur, UP
SDIC High School - (Percentage: 66.0) Intermediate - (Percentage: 77.0)	2013 - 2015 Prayagraj, UP

Freelance Experience

SU Test - MCQ Mock Test Platform Live Full Stack Developer	Jan 2026 – Mar 2026 Uttar Pradesh
• Tech Stack: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Drizzle ORM, Clerk Auth, Razorpay, Vercel • Built a complete exam-prep SaaS: timed MCQ tests, instant scoring, performance analytics, and a public leaderboard — designed to mirror real maritime entrance exams. • Implemented Clerk authentication, Razorpay-based paid test access, and role-based content visibility; shipped the IMU CET Mock Test 2026 (200 questions) as the first paid offering, with real users purchasing and completing tests. • Owned the entire product lifecycle — schema design, API routes, UI/UX, payment flows, and production deployment — independently.	
Shipping Updates — Maritime E-Commerce & Study Platform Live Full Stack Developer	Apr 2026 – May 2026 Uttar Pradesh
• Tech Stack: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Drizzle ORM, Clerk Auth, Razorpay, Vercel • Built a full-stack educational e-commerce platform for Merchant Navy aspirants, enabling purchase of physical books and instant PDF downloads. • Integrated Razorpay for secure online transactions and implemented order management for digital and physical delivery workflows, with a fully responsive UI across all pages. • Deployed on Vercel with environment-based configuration; platform currently serves real users across India.	

Projects

Clentric — Client & Workspace Management SaaS In Development • Tech Stack: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Drizzle ORM, Supabase, Clerk, Vercel • Building a SaaS platform for freelancers to manage clients, projects, invoices, and proposals — with production-grade architecture (schema design, server-side validation, role-based auth, and a feature-branch to production Git workflow).
DropFile — Cloud File Manager Live GitHub • Tech Stack: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Drizzle ORM, Clerk Auth, Vercel • Built a full-stack cloud file management app with drag-and-drop uploads, folder creation, trash/restore system, and star/favourites. • Used Drizzle ORM with PostgreSQL for scalable database management; deployed on Vercel with a fully responsive UI.
Secondary Brain — Bookmarking App GitHub • Tech Stack: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma ORM, NextAuth • Centralized bookmarking app to save and organize YouTube videos, tweets, and links with full CRUD and authenticated user accounts. • Designed a clean, distraction-free UI with category-based filtering, making it easy to retrieve saved content quickly across devices.

Technical Skills

Frontend: React.js, Next.js, Tailwind CSS, TypeScript, JavaScript
Backend: Node.js, Next.js API Routes, REST APIs, Express.js (MERN)
Database: PostgreSQL, Drizzle ORM, Prisma ORM, MongoDB
Auth: Clerk, NextAuth (Auth.js)
DevOps: Git, GitHub Actions, Docker (basics), Vercel
Payments: Razorpay (live integration)
Tools: VSCode, Postman, Figma (basic)
